1. Claims 20-25 and 29-31 are allowed.

2. Claims 17-19 and 26-28 are provisionally rejected on the ground of nonstatutory double patenting over claims 1-3 of copending Application No. 10/584,474. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Application No. 10/584,474 is directed to a thermal transfer sheet comprising a substrate having a heat resistant slip layer on one side and a polyvinylpyrrolidone adhesive layer coated with a dye layer on the other side. Since the polyvinylpyrrolidone is cross-linked, it is "modified".

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

3. Applicants' are requested to supply a copy of reference AK (JP07-102746) cited on their PTOL-1449 in order to make the record complete.
